EDUCATION

ABES Engineering College

B.Tech in CS and Engineering (Data Science) | CGPA: 8.56

Ghaziabad, India

Sep 2024 – June 2028

DAV Public School

Intermediate (PCM) | Percentage: 90.4%

Uttar Pradesh, India

2023 – 2024

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, RBAC, Socket.IO

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM

AI/GenAI: LLM APIs, Generative AI, Prompt Engineering, Groq, Gemini API

DevOps & Tools: Git, GitHub, Docker, CI/CD, Redis, BullMQ, Postman, Render, Vercel

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

EXPERIENCE

AI Intern

IBM Virtual Internship in AI

July 2026 – Aug. 2026

Remote

- Built and deployed HireSense with React, FastAPI, and PostgreSQL; implemented an 88-skill spaCy taxonomy and TF-IDF cosine similarity for resume-JD matching.
- Re-designed the sentence-transformers pipeline to meet a 512MB memory limit, reducing runtime usage to ~295MB while maintaining automated candidate ranking.
- Established a layout-aware PDF/DOCX processing pipeline with a 7-point rule-based engine for explainable ATS parseability feedback.

PROJECTS

ScoutFlow | React.js, Node.js, Express.js, FastAPI, PostgreSQL, Redis

Github | Live

- Engineered an AI data-intelligence platform with a 10-step pipeline converting natural-language requirements into validated, deduplicated, source-traceable datasets.
- Designed 20+ REST APIs and 3 AI services for requirement parsing, workflow planning, and data extraction, backed by PostgreSQL, Redis, and BullMQ.
- Offloaded multi-source extraction to Redis-backed BullMQ workers with 3-way concurrency, reducing HTTP request latency by ~85%.

TaskFlow | React.js, Node.js, Express.js, MongoDB, Groq Llama 3.3, JWT, Tailwind CSS

Github | Live

- Developed a full-stack AI project-management application with Kanban boards, sprint management, RBAC, analytics, and responsive dashboards using the MERN stack.
- Integrated 4 AI workflows for task drafting, label suggestions, natural-language search, and sprint summaries through Groq Llama 3.3.
- Implemented JWT authentication and role-based access control across 12+ REST APIs with MongoDB aggregation pipelines for project analytics.

ACHIEVEMENTS

- Reached the Semi-Final of the Economic Times AI Hackathon 2026 among teams from across the country.
- Solved **250+ DSA problems** across **LeetCode** and **GeeksforGeeks**.

EXTRACURRICULAR ACTIVITIES

- Contributed to **ACES** and the **CSE (Data Science) Social Media Team** through content creation, event coverage, and digital outreach.
